2

Each Dice Roll - Explained in more detail

Remember, each inning consists of three rolls of a 6d dice.

ROLL 1. Pitchers Roll

Roll the dice and refer to the **Pitching** Table.

The pitcher will roll either Strikes Outs (Ks) or Base on Balls (BBs)

Ks and BBs are recorded in the stats.

ROLL 2. Batter's Roll

Roll the dice and refer to the **Batting** Table

The batter rolls to see how may Hits he/she can make with the remaining Plate Appearances (that are not used up by Ks and BBs).

If the batter has at least one Hit or BBs then a third roll is required...

ROLL 3. Scoring Roll (may not be required if there are no Hits or BBs)

Roll the dice and refer to the **Scoring** Table

This third roll will correspond to the scenario setup by the first two rolls.

This roll determines the maximum number of runs the inning can score (up to the total number of runners on base)

- SGL=Single (max 1 RBI)
- DBL = Double (max 2 RBIs)
- TPL = Triple (max 3 RBIs)
- HR = Home Run (max 4 RBIs)

For example of the pitcher rolls 2 Ks and the batter hits 2 hits, then the roll applies to the scoring section under '2 Strikes Outs'. In this case the batter can either score a Home Run and bat in all the runners on base, or hit a single RBI.

Additional Rules

Tied Games (see the end of the Quick Start Guide for full details)

A game will enter overtime if it is tied at the end of 9 innings. Tied games are decided through **LOBs (Left on Base)** and **Error Runs scoring chart**.

See the Quick Start Guide for an explanation.

Starting Pitchers have a Pitching Count.

On the score sheet provided, the pitcher will accumulate PPs (Pitching Points) for each inning he/she pitches.

1 PP=10 Pitches

Once **10 PPs (100 pitches)** are reached/passed the starter is must be replaced by the bullpen.

Bullpen pitches must be replaced once they reach/pass **2 PPs (20 pitches)**

Alternatively, you can replace a pitcher at anytime before they reach the pitching count.

Refer to the **Pitcher Count** Table

Star Batters

Batters with a ★ next to their name are '*big hitters*' and have the opportunity to bat-in more HR/RBIs in certain situations (see **Scoring** Table)

Designated Hitters

The DH is used by default in Inning Baseball, purely for convenience (and logistics). However, you are free to play without using a DH and the Starting Pitcher will bat instead.

Home team leading in the 9th Inning

In 'real' Baseball, the Home team is not required to bat the 9th Inning when they are leading. In Inning Baseball, it is recommended that you still play the bottom of the 9th regardless. Otherwise the 9th batter will not get a bat. *Besides, who wouldn't like to add 2 or 3 more runs to their lead?*

Quick Start Guide

If you haven't already, check out the quick start guide. It goes through an example game showing how each part of the game fits together.

Random Result Generator and Cards

An alternative way to play Inning Baseball is by using the random Result Generator (also in Card form).

The Random Results Generator/Cards simply produce whole inning results based on the above steps.

No dice are required.

It can be found in the Excel Workbook.

Happy Playing...
